

Effective, economical weed control for turf, including golf courses and sod farms.

Trillion®

CHALLENGE

Sod farms, golf courses and other turf growers struggle to find the right solution to tackle tough weed problems. Too many brands and products fall short of providing a winning combination of effective weed control at a great price.

NUFARM SOLUTION

Trillion® turf herbicide delivers the hard-hitting answer to tough turf weeds including dandelion, chickweed, plantain and creeping Charlie. The familiar Group 4 formulation provides the performance and price you need in easy-to-handle jugs or special order totes.

REGISTERED USES

Turfgrass including golf courses, sod farms, and municipal, industrial and residential turf

WEEDS CONTROLLED		APPLICATION RATES & NOTES
Bedstraw	Ground ivy (creeping Charlie)	<p>TURF (OTHER THAN BENTGRASS): On established turf, apply at the rate of 60 mL per 100 m² in 10 L of water. For larger areas apply at the rate of 5.5 L per hectare in 300 L of water.</p> <p>FOR BENTGRASS: Apply at a half rate – 30 mL per 100 m² in May or late August and September. Use 20 L of water per 100 m². Slight yellowing will occur but will disappear after about 1 week. Do not overdose bentgrass as damage or kill may occur. Make sure correct rate is applied to the whole area treated. When spraying bentgrass use a 1 nozzle sprayer. Make sure spray application does not overlap or excess material will be applied to overlapped areas and damage is more likely to occur.</p>
Black medic (yellow clover)	Heal-all	
Buttercup	Ironweed	
Chickweed	Knotweed	
Clover	Plantain	
Daisy species (English and ground)	Poison ivy	
Dandelion	Ragweed	
Devil's paint brush	Shepherd's-purse	

PERFORMANCE TIPS

- For best results apply when weeds are growing quickly
- If weed populations do not warrant a broadcast application, consider spot treatments that target only weedy areas
- Grass seed can be safely sown 1–2 weeks after application at recommended rate
- Do not water turf within 24 hours of application
- Do not apply to newly seeded lawns until after third mowing
- Do not freeze

ACTIVE INGREDIENT

> 2,4-D (190 g a.e./L),
mecoprop-p (100 g a.e./L),
dicamba (18 g a.e./L)

FORMULATION

> liquid

CHEMICAL FAMILY

> phenoxy-carboxylic acid

PACKAGE SIZE

> 2 x 10 L jug, 155 L drum, 1000 L tote
> 1 jug treats 4.5 acres (at 5.5 L/ha)

RAINFAST

> do not spray if rain is forecast

APPLICATION / SEASON

> up to 2 broadcast applications

SURFACTANT NEEDED

> no

PCP

> 27972

WSSA GROUP

> 4

BENEFITS

- Consistent broad-spectrum control of tough annual and perennial turf weeds
- 3-way active ingredient formulation provides strong take-down of the toughest weeds
- Re-entry permitted once spray has thoroughly dried
- Weed control formulated specifically for turfgrass
- Excellent systemic control of emerged weeds
- Non-residual control leaves options open
- Convenient packaging options

TIMING

- May and early June, and late August and September
- Apply when weeds are actively growing and not under stress
